

TECHNICAL PERFORMANCE

Certification & testing

Standard Supply Co is committed to continually improving and ensuring the ongoing quality of its products. Our products have been independently tested to assess their performance levels and how they perform against a number of competitors products.

Key performance criteria was applied in the testing to determine the overall performance that is experienced during installation and throughout the life of the product. These included Impact Strength, Weathering, Gloss Retention, Modulus (stiffness), Heat Distortion Temperature and Yield Strength.

As concluded by independent laboratories, test results clearly show that Ezyduct® outperformed competitors across most categories and was the clear winner in overall performance.
